

# KRISH THAKUR

Digital Designer & Frontend Developer

Delhi, India | thakurkrish7221@gmail.com | Portfolio: Personal Website

## MY JOURNEY & VISION

I am a digital designer and web developer focused on building clean, modern, and functional websites. I enjoy simplifying complex ideas and transforming them into user-friendly and visually balanced digital experiences. I strongly believe that good design is not about adding more elements, but about removing what is unnecessary.

I am continuously learning and improving my skills in web design and frontend development. My goal is to create meaningful digital solutions that not only look good but also help ideas and businesses grow online.

## EXPERIENCE

### **Creative Strategist / Designer & Builder** — Freelancer (Self-Employed)

2026 – Present

Working on web design and frontend development projects with a focus on clean layouts, responsive design, and usability. Managing projects independently from concept to execution.

### **Frontend Developer** — Ed-Tech

2025 – 2026

Contributed to frontend development for educational platforms. Assisted in building responsive UI components and improving overall structure and user experience.

### **Frontend Developer (Practice)** — Personal Projects

2024 – 2025

Built multiple practice projects using HTML, CSS, and Bootstrap. Focused on layout structure, responsiveness, and strengthening frontend fundamentals through hands-on learning.

## SERVICES
